

NAME: \_\_\_\_\_ DATE: \_\_\_\_\_ PERIOD: \_\_\_\_\_

\*\*\*\*\*

Choose the correct answer:

\*\*\*\*\*

1. Name an act where a person claims another's idea as his or her own.  
(A) Infringement (B) Netiquette (C) Plagiarism (D) Ergonomics
2. Give the shortcut key to redo the last action performed  
(A) Ctrl + F (B) Ctrl + U (C) Ctrl + O (D) Ctrl + Y
3. What is the science of fitting a job or task to a worker?  
(A) Infringement (B) Backward Compatibility (C) Ergonomics (D) Netiquette
4. Give the shortcut key to open document window  
(A) Ctrl + F (B) Ctrl + U (C) Ctrl + O (D) Ctrl + V
5. This component part reads information off of storage disks.  
(A) modem (B) motherboard (C) ports (D) disk drives
6. Give the name of a generic top-level domain used on the Internet's Domain Name System.  
(A) .doc (B) COM (C) .wpd (D) .com (commercial)
7. What can also be referred to as working from home and is a work Arrangement in which employees enjoy limited flexibility in working location and hours where work-related travel is replaced.  
(A) Telemedicine (B) Internship (C) Telecommuting (D) Terminator
8. What vocabulary word is a smaller division made w/in the hard drive to help organize programs & files w/in larger ones?  
(A) Root Directory (B) Directory (C) Topology (D) Subdirectory
9. What is a diagram that details the elements for a computer system?  
(A) Schematic (B) Flowchart (C) Process (D) Basic Flow Chart Symbols
10. What is a device enables a computer to transmit data over telephone or cable lines called?  
(A) ports (B) modem (C) video card (D) sound card
11. What contains special circuits for operating the computer's sound?  
(A) ports (B) sound card (C) video card (D) modem
12. What is the largest circuit board and has many smaller boards plugged into it while it holds all of the most important parts of the computer called?  
(A) modem (B) motherboard (C) disk drives (D) ports
13. What is considered to be like a brain because it controls information and tells other parts what to do?  
(A) CPU (B) RAM (C) ROM (D) BIOS
14. What are the means of visually presenting the flow of data through an Information processing system called?  
(A) Schematic (B) Flowchart (C) Process (D) Basic Flow Chart Symbols
15. What hardware device oversees a program during execution?  
(A) A Monitor (B) A keyboard (C) A printer (D) A mouse
16. Give the vocabulary word that means giving the unofficial rules defining proper behavior to use on the internet.  
(A) Operating System (B) Netiquette (C) Ergonomics (D) Infringement

17. What do programmers usually refer to when addressing the pointer that controls the mouse?  
(A) Cursor (B) Boot (C) Protocol (D) Cookies
18. A smaller division made w/in the hard drive to help organize programs & files w/in larger ones.  
(A) Root Directory (B) Directory (C) Topology (D) Subdirectory
19. This chip wakes up the computer when you turn it on and reminds the computer what are the different parts and their responsibility.  
(A) CPU (B) RAM (C) ROM (D) BIOS
20. What is a naturally designed sequence of changes called?  
(A) Schematic (B) Flowchart (C) Process (D) Basic Flow Chart Symbols
21. What is the main hard drive window called?  
(A) Root Directory (B) Directory (C) Topology (D) Subdirectory
22. What are unique pieces of code used to identify & track web users?  
(A) Cursor (B) Boot (C) Protocol (D) Cookies
23. What vocabulary word means violating a law or right?  
(A) Infringement (B) Backward Compatibility (C) Ergonomics (D) Netiquette
24. What is the divisions of a hard drive that hold the files in an organized way?  
(A) Root Directory (B) Directory (C) Topology (D) Subdirectory
25. What is a diagram that details the elements for a computer system?  
(A) Schematic (B) Flowchart (C) Process (D) Basic Flow Chart Symbols
26. This chip wakes up the computer when you turn it on and reminds the computer what are the different parts and their responsibility.  
(A) CPU (B) RAM (C) ROM (D) BIOS
27. Give the vocabulary word for a set of formal rules used in describing how to transmit data across a network  
(A) Cursor (B) Boot (C) Protocol (D) Cookies
28. What contains special circuits for operating the computer's sound?  
(A) ports (B) sound card (C) video card (D) modem
29. A general structure of a network  
(A) Root Directory (B) Directory (C) Topology (D) Subdirectory
30. Give the name of a generic top-level domain used on the Internet's Domain Name System.  
(A) .com (commercial) (B) COM (C) .wpd (D) .doc
31. This can also be referred to as working from home an is a work Arrangement in which employees enjoy limited flexibility in working location and hours where work-related travel is replaced.  
(A) Telemedicine (B) Internship (C) Telecommuting (D) Terminator
32. Give the shortcut key to underline highlighted selection.  
(A) Ctrl + F (B) Ctrl + U (C) Ctrl + O (D) Ctrl + V
33. What is a device enables a computer to transmit data over telephone or cable lines?  
(A) ports (B) modem (C) video card (D) sound card

34. This component part reads information off of storage disks.  
(A) modem (B) motherboard (C) ports (D) disk drives
35. Name the places on the outside of the computer case where other components are plugged into the hardware.  
(A) ports (B) sound card (C) video card (D) modem
36. An area network also known as Cluster Area Network that connects servers to data storage devices through a technology like Fiber Channel and links high-performance computers with high-speed connections in a cluster configuration.  
(A) LAN (B) MAN (C) PAN (D) SAN
37. What handles graphics that are displayed on the monitor?  
(A) ports (B) sound card (C) video card (D) modem
38. The largest circuit board & has many smaller boards plugged into it while it holds all of the most important parts of the computer called?  
(A) modem (B) motherboard (C) disk drives (D) ports
39. What acts like a brain because it controls information and tells other parts what to do?  
(A) CPU (B) RAM (C) ROM (D) BIOS
40. What handles graphics that are displayed on the monitor?  
(A) ports (B) sound card (C) video card (D) modem
41. A protocol that adds security to WLANs and is designed to provide the same level of security as that of a wired LAN while aiming to use high-frequency radio waves rather than wires to communicate between nodes in order to provide security by encrypting data over radio waves so that it is protected as it is transmitted from one end point to another  
(A) LUN (B) WEP (C) WPA (D) Wi-Fi Alliance
42. An area network used for communication among computer devices close to one person reaching within about 20-30 feet  
(A) LAN (B) MAN (C) PAN (D) SAN
43. The means of visually presenting the flow of data through an Information processing system is called what?  
(A) Schematic (B) Flowchart (C) Process (D) Basic Flow Chart Symbols
44. Give the name of an experimental general topology local area network based on ATM  
(A) Internet (B) Wi-Fi (C) Ethernet (D) Fairisle
45. An area network that uses multimedia workstations that are based around an ATM interconnect where all communication between peripherals, the CPU and its main memory can be achieved by sending ATM cells through a Fairisle  
(A) CAN (B) DAN (C) GAN (D) LAN
46. Name an act where a person claims another's idea as his or her own.  
(A) Infringement (B) Netiquette (C) Plagiarism (D) Ergonomics
47. What hardware device oversees a program during execution?  
(A) A Monitor (B) A keyboard (C) A printer (D) A mouse

48. Give the term used in the address assigned to a logical unit where a storage entity can include parts of storage on a disk drive, the entire storage on a disk drive, the total storage on multiple drives in a disk array, or any of the other combinations.  
(A) WAN (B) WLAN (C) ADSL (D) LUN
49. What do programmers usually refer to when addressing the pointer that controls the mouse?  
(A) Cursor (B) Boot (C) Protocol (D) Cookies
50. An area network composed of different interconnected computer networks that cover an unlimited geographical area  
(A) CAN (B) DAN (C) GAN (D) LAN
51. What is the science of fitting a job or task to a worker?  
(A) Infringement (B) Backward Compatibility (C) Ergonomics (D) Netiquette
52. What is the main hard drive window called?  
(A) Root Directory (B) Directory (C) Topology (D) Subdirectory
53. What are unique pieces of code used to identify & track web users?  
(A) Cursor (B) Boot (C) Protocol (D) Cookies
54. What are the divisions of a hard drive that hold the files in an organized way?  
(A) Root Directory (B) Directory (C) Topology (D) Subdirectory
55. A geographically dispersed network built for private organizations which connects LANs to a WAN & other types of networks together in different geographical locations  
(A) WAN (B) WLAN (C) ADSL (D) LUN
56. A set of formal rules used in describing how to transmit data across a network  
(A) Cursor (B) Boot (C) Protocol (D) Cookies
57. An area network which typically uses wireless infrastructure or Optical fiber connections to link its sites ranging from several blocks of buildings to entire cities.  
(A) LAN (B) MAN (C) PAN (D) SAN
58. A class of systems designed to enhance the security of wireless Wi-Fi computer networks which was created in response to several serious weaknesses researchers had found in the previous WEP systems  
(A) LUN (B) WEP (C) WPA (D) Wi-Fi Alliance
59. An area network that supplies networking capability to a group of computers in close proximity to each other.  
(A) GAN (B) LAN (C) MAN (D) PAN
60. A metropolitan area network spanning multiple LANs smaller than a MAN but are specifically for an academic setting within a limited geographical area.  
(A) CAN (B) DAN (C) GAN (D) LAN
61. A LAN based Wi-Fi wireless network technology that provides wireless network communication over short distances using radio or infrared signals instead of traditional network cabling  
(A) WAN (B) WLAN (C) ADSL (D) LUN
